- ❖ Kinyarwanda

Samuel kamanzi

Full Stack Developer

PROFILE

As a full-stack developer, I am skilled in both front-end and back-end technologies, allowing me to build and maintain complete web applications. I handle everything from designing user interfaces and creating responsive layouts with HTML, CSS, and JavaScript, to developing server-side logic, managing databases, and integrating APIs. Proficient in a range of programming languages, frameworks, and tools, I bridge the gap between different components of an application, ensuring cohesive functionality and smooth user experiences. My broad expertise also extends to DevOps practices, including deployment and continuous integration, making me essential for end-to-end project development.
